I am writting to ask that you carefully consider the National Association of Broadcasters Petition 04-160. I benefit a great deal from the xm radio traffic and weather channels in my line of work as a long haul truck driver on the road a great deal.

XM also provides variety and quality not available elsewhere.

I pay for this great service and it should not be up to the National Assoc.of Broadcasters to dictate or monopolize on what I want to listen to.

Please reject this petition 04-160 and show support for XM's ability to provide me with this programming and technology.
